SJOBEFÄLSFÖRENINGEN • FÉLAG VÉLSTJÓRA OG MÁLMTÆKNIMANNA

## PRESS STATEMENT

*Nordic Engineer Officers Federation (NMF) was founded on February 21<sup>st</sup> 1919 and represents approx. 30,000 engineer officers in Denmark, Sweden, Norway, Finland, Iceland and the Faroe Islands.*

Statement from the NMF meeting in the Faroe Islands, 8th - 9th of April 2019.

Nordic Engineer Officers Federation will celebrate its 100 years of Nordic cooperation in Copenhagen on October 7<sup>th</sup> 2019 with a conference and dinner.

In all the Nordic countries, there is a great need for engineers, both in the energy and environmental sectors, the public sector, shipping, the offshore sector and the industry. Therefore, NMF will focus on the recruitment efforts, and in the future assess the results thereof. NMF will strengthen the coordination of collective bargaining and assist each other in developing pay and employment conditions in the Nordic countries.

NMF will continue to develop useful international statistics. NMF will continue to strengthen cooperation on the training and development of engineers and ship officers in the Nordic countries, so that in future the members will also become managers who contribute to the Nordic countries being among the leaders in the world within management and technology.

NMF will continue to coordinate consultation responses and, through cooperation, seek maximum influence on the areas that concern the members' interests.

NMF has set goals to cooperate in several areas with common challenges in the Nordic countries for the next 100 years. Especially in the fields of energy and environmental technology, education, automation and management, so the Nordic engineers can continue to be the technical leaders in the world.
